

Moisture Only: For Large Square baler

P/N: PFC-0600A1

- Specification:
- Accurate +/-1%
- Moisture range 8-70%
- Integrated to baler electronics
- No calibration required

(For Squadra P/N: PFC-0665UHDE1)

Moisture Pro: For Large Square baler

P/N: PFC-0665AE

Specification:

- Accurate +/-1%
- Moisture range 8-70%
- Integrated to baler electronics
- No calibration required
- Include full job records

(For Squadra P/N: PFC-600UHDE)

Automatic Applicator: For Large Square baler

Specification:

- Integrated to baler electronics
- Integrated moisture meter
- Full rate controlled system
- Links to baler weigh scale option

P/N: 4 String Packer: PFC-696A4518B

P/N: 6 String Packer: PFC-696A4518BX

P/N: 4 String ProCut: PFC-696A4542B

P/N: 6 String ProCut: PFC-696A4542BX

(For Squadra refer to price guide)

H₂O Precision Moisture: For Round Balers

Specification:

- Blue tooth link IOS or Android device
- Twin moisture Discs
- Moisture range 8-60%
- Moisture accuracy +/-1%
- Optional high moisture marking of bales
- P/N: Refer to price guide for all options

Automatic Applicator: For Round Balers

Specification:

- Baler mounted tank or tractor front linkage options
- Moisture range 8-60%
- Moisture accuracy +/-1%
- Full rate controlled application
- P/N: Refer to price guide for all options

HayBoss Options

Bale Marker:

Specification:

- System triggered by operator's alarm point
- Sprays a red food grade colour
- Marks the flakes in the bale that are exceeding the alarm point

Bale Marker to add to Moisture Only P/N: PFC-0840A

Bale Marker to add to Moisture Pro or full Applicator P/N: PFC-0840

Baler's Choice Preservative:

- Correctly applying Baler's Choice preservative to hay and straw prevents mould growth and spoilage in the stack
- It is particularly suited to high quality hay and straw production
- Baler's Choice preservative is manufactured to be machinery safe and stronger litre to litre than any other acid on the market
- With Baler's Choice, hay and straw can be baled between 16-27% moisture with no mould (small square and round 16-30% moisture).
- On average 1 day earlier baling of hay
- Gets the baler closer behind the combine
- Complete record download via USB and viewable using Microsoft Excel
- On average 30% more baling per day
- Available in 200 and 1000 litre containers
 - 200 Litres P/N: BC200
 - 1000 Litres P/N: BC1000

Manual Applicators:

Specification:

- Suitable for all balers
- Suitable for forage wagons
- Fixed rate application
- 6.7 litre per minute pump
- Available as baler or front linkage mounted
- Available as front linkage mounted
- Target market of silage/haylage producer or small producer of hay
